## 1 Assymptotic Notation and Recurrences

## 1.1 master method

$$T(n) = aT\left(\frac{n}{b}\right) + O(n^d)$$

$$a = \text{\#recursive calls, } a > 1$$

$$b = \text{input size shrinkage factor}(b > 1)$$

$$d \text{ exponent in the runtime } d > 0$$

$$T(n) = \begin{cases} O(n^d \log(n)) & a = b^d \\ O(n^d) & a < b^d \\ O(n^{\log_b a}) = O(a^{\log_b n}) & a > b^d \end{cases}$$
